Position

Experte IT-Quick-Check (m/w/d)

Aufgabe und Verantwortungen

IT quick check: entrepreneurial perspective for the entire Group.

- For the growth strategy with value creation, it should be outlined how IT can adequately support further development on the basis of a future-oriented IT roadmap.
- Bird's-eye view of the growth strategy under criteria such as:
 - Functions (supply chain, marketing, sales, logistics, finance, controlling etc.),
 - Organization (structure/processes) and technology (hardware, software, AI, cloud etc.),
 - Communication platforms and office environments,
 - Expenses,
 - Internet: cloud, e-commerce etc.,
 - Data security such as backup,
 - Governance and operational processes of IT.

IT quick check process

- Development analysis with the central managers for about 3-5 days,
- Scope and first need for action,
- Short validated presentation and
- Discuss and adopt with management the next steps/priorities.

IT quick check benefit

- Consistent understanding of IT contribution before making initial investments i.e. in
 - communication tools,
 - business warehousing,
 - server/cloud capacity,

- ERP development,
- alternative approaches for IT tools.
- The IT quick check is a basis for further process and IT development.

Qualifikation / Profil

- Erfahrungen als IT-Leiter / CIO.
- Erfahrungen in der strategischen Ausrichtung von Unternehmen.
- Internationaler Moderator.
- Erfahrungen (B2B) im Bau von Großprojekten.
