Standort Großraum Zürich, Schweiz
Start 03.01.2022
Kapazität Vollzeit, wenig Homeoffice
Laufzeit Neun Monate mit Option auf Verlängerung
Branche Industrie (größerer Konzern)

Position

Projektleiter SAP ECC (m/w/d)

Aufgabe und Verantwortungen

- Our customer rolls out **SAP ECC worldwide**. The template has been completed and will only be supplemented by priority 1 and legal requirements during the rollouts.
- The rollout should take place under **very high time pressure**, i. e. 40 legal companies within 3 years.
- The first rollouts in smaller companies were successfully implemented. This, however, with a lot of commitment and sometimes improvisations were necessary.
- The **most important goal** is to **stick to the ambitious schedule** and to **ensure the quality** of the project work so that the business is not put at risk in the course of the GoLives. The "big" rollouts (Germany, Switzerland, Liechtenstein as well as in Asia in the countries China, Taiwan, Korea and Japan) are particularly in focus. Germany, Switzerland and Liechtenstein should go live on **April 1st, 2022** (600 users).
- About 1.5 years ago, the existing project management team developed a poorly managed project very positively. The temporary project manager is supposed to support the project management team as an 'external colleague' and also receives a direct reporting line to the EC (CFO, Division CEO) for necessary escalations. Support in terms of project structures and precision is necessary here.
- Our customer's business is **inexperienced in SAP** and historically there is **no 'process thinking'**. An important part of the project is therefore to take care of the business users (training, test).

Qualifikation / Profil

- Agile, powerful, executive, hands-on maker with seniority.
- Manager who finds his way around quickly, restructuring experience.
- Rescuers & Helpers type, but also stringent challenger with precision.
- Tool and process flexibility.
- Strong communication skills (team and board).
- Fluent in English & German.
- Available immediately, not later than beginning of January.
- Large project experience / SAP project experience.
- Initially commissioned for approximately 7-9 months.
